Sd12 semester 3

JAVA QAP2

February 2025

Spread out over the week, I estimate that this assignment took me 8 hours. This includes research, planning, coding and testing.

Online resources that I used are youtube, w3schools, google, bing and chatgpt

I did not require help from friends.

I did not ask questions to instructors.

I'm afraid to say that I find the java assignments easy, the UML diagrams are given, and they contain the answers. I feel confident that I could solve similar problems.
